XM Radio is the purest form of broadcasting that has been transmitted to its paying customers in the last twenty five years. Please leave the entire concept alone!! It should not be regulated under current FCC rules as the content is provided at a cost to paying customers who ultimately dictate the content.

The traffic and weather is the quickest and most accurate traffic I have ever heard on radio. The lack of commercial interruption makes this service a timely feature which is currently unmatched by any local FM or AM station in every market to which I have listened.

I respectfully urge the FCC to reject the NAB's petition 04-160
